Based on client requirements and our textile technology engineer knowledge R&D of new products in regard to operational requirements and all-weather conditions; Technical engineering R&D of multi role UGV military personnel support system to serve for CS and CSS tasks (including RCWS).

Potential Business Partners

Agents, wholesalers, military organizations

EASYWOOD Ltd.

Contact person:

Jurijs Šilins, Member of the Board

E-mail: jurijs.silins@easywood.lv

Phone: +371 26765224

Web: easywood.lv

Easywood Ltd. is a Latvian manufacturer specialising in glued laminated timber (glulam) structural products for residential and industrial construction. The company produces engineered wood components designed for modern timber construction projects.

Easywood combines advanced manufacturing technologies with CNC processing to deliver high-quality structural timber elements tailored for construction applications.

Products/services

Production of glued laminated timber structural elements, including glulam beams and panels (strength classes GL24h, GL28h and GL28c). CNC machining and processing of timber structures for residential and industrial buildings.

Potential Business Partners

Real estate developers, construction companies, building material retailers and lumber distributors interested in structural timber products for construction projects.

Environmental management

Eco Baltia Vide Ltd.

Contact person:
Diāna Baranovska
Lab! Materials Management Department
Manager
E-mail: diana.baranovska@ecobaltiavide.lv
Phone: +371 29283666

Web: <https://www.ecobaltiavide.lv/>

Eco Baltia vide Ltd. is an environmental management company in Latvia, providing waste collection, sorting, recycling, and environmentally responsible disposal services for both households and businesses. The company is part of the Eco Baltia Group, which includes several subsidiaries and recycling entities, including the producer responsibility organization "Latvijas Zaļais punkts", delivering a complete waste management cycle and sustainable solutions. The Group's main shareholders are INVL Baltic Sea Growth Fund and EBRD.

Potential Business Partners

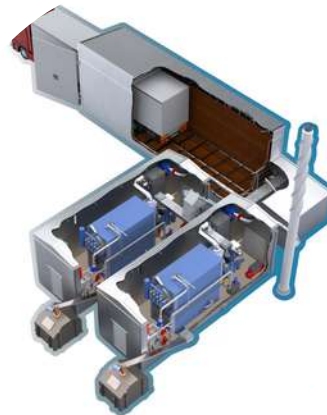

The company is seeking cooperation partners in Ukraine, including municipalities, waste management companies, and other industry stakeholders, with the aim of developing efficient and sustainable waste management solutions. Eco Baltia Vide is interested in collaboration in knowledge exchange, system development and optimization, advancement of sorting and recycling practices, as well as the implementation of joint projects by introducing modern and scalable solutions tailored to local needs.

Company Interests:

- Expand international cooperation in waste management and recycling.
- Share expertise and best practices in sustainable waste solutions.
- Implement modern, efficient, and scalable waste management systems.
- Develop joint projects supporting the circular economy and improving environmental performance.

Manufacture of fabricated metal
products n.e.c.

EcoHeat Technologies Ltd.

Contact person:
Mārtiņš Vītols, Sales Manager

Phone: +371 25616 180
Web: ecoheatholdings.lv

EcoHeat Technologies products: Biomass heating boilers, modular (container-type) biomass boiler houses, automated fuel feeding and ash removal systems, heat supply control and automation solutions, cast iron and steel castings and mechanical assemblies.

Potential Business Partners

Representatives of mechanical engineering companies, agricultural machinery manufacturers, representatives of industrial manufacturing, casting and wear parts suppliers, technical directors of urban planning and district heating companies, representatives of construction companies for industrial energy facilities.

Computer programming information
technology and computer services

Exonicus R&D Ltd.

Contact persons:
Māris Tašmans, Sales and Partnership
Manager
E-mail: Maris.Tasmans@exonicus.eu
Phone: +37127310152
Web: exonicus.eu

Exonicus is a European defence technology company developing MilExTS®, an Extended Reality (XR) trauma simulator for Tactical Combat Casualty Care (TCCC) training, built around the MARCH algorithm. The platform enables scalable, standardized, and measurable combat medical training without dependency on instructor availability or infrastructure. Designed for field deployment, MilExTS® operates on Meta Quest 3/3S and requires no classrooms, mannequins, or internet connection. Co-created with military medical professionals and validated in Ukraine and NATO-aligned environments, the system supports mass-scale medical readiness aligned with NATO standards.

Potential Business Partners

Ministry of Defence, National Guard, National Armed Forces, military and medical training centers in Ukraine and Poland, as well as WB Group, for MilExTS® pilot projects.

FORTES Ltd.

Contact person:
Armands Zemītis
E-mail: armands.zemitis@fortesenergy.lv
Phone: +371 29334099
Web: fortesenergy.lv

FORTES Ltd. is a technology company specialising in the development and manufacturing of biomass power plants based on wood gasification technology. The company provides efficient and flexible energy solutions for decentralised electricity and heat generation.

FORTES has successfully implemented projects in Europe and Japan, with installed capacity ranging from 140 kWel / 280 kWth up to 1.3 MWel / 2.6 MWth, delivering reliable solutions for industrial and municipal energy systems.

Products/services

Design, manufacturing and implementation of biomass power plants based on wood gasification technology. FORTES develops solutions for combined heat and power (CHP) generation, supporting decentralised and resilient energy systems.

Potential Business Partners

Energy companies and utilities involved in electricity and heat generation, including operators of combined heat and power plants, gas-fired power plants, biomass power plants and district heating systems. The company is particularly interested in cooperation with Ukrainian energy sector organisations such as DTEK Group, Naftogaz Group and Kyivteploenergo.

KASKI Ltd.

Contact person:
Andris Bricis, Chief Executive Officer
E-mail: andris.bricis@kaski.lv
Phone: +371 26411267
Web: kaski.lv

KASKI Ltd. is a Latvian manufacturer specialising in the production of high-quality wooden entrance doors. The company combines traditional woodworking expertise with modern manufacturing technologies to produce durable and aesthetically refined door solutions for residential and commercial buildings.

With a strong export orientation, KASKI supplies its products to international markets and works closely with construction companies, developers and distributors.

Products/services

Manufacturing and wholesale of wooden exterior doors for residential and commercial buildings.

Potential Business Partners

Wholesalers, DIY retail chains, construction companies, real estate developers and municipalities interested in high-quality wooden door solutions.

Latvenergo JSC.

Contact person:

Lauris Baltiņš, Head of Renewable Energy
Support Division

E-mail: lauris.baltins@latvenergo.lv

Phone: +371 22027945

Web: latvenergo.lv

Latvenergo JSC is the largest energy company in Latvia and one of the leading energy utilities in the Baltic region. The company is engaged in electricity generation, trading, and the development of renewable energy projects. Latvenergo is actively expanding its portfolio of wind and solar energy projects in Latvia and neighbouring markets, contributing to the development of sustainable and climate-neutral energy systems.

Through its activities, Latvenergo focuses on increasing renewable energy capacity, strengthening regional energy security, and supporting the transition towards a low-carbon economy.

Products/services

- Development and operation of renewable energy projects, including wind and solar power generation.
- Electricity generation and supply, as well as energy trading in the Baltic and neighbouring markets.
- Development of new renewable energy parks and partnerships for the expansion of wind and solar energy capacity.

Activities of business and employers' organizations

Latvian Exporters Association “The Red Jackets”

Contact person:

organizations

Polish-Latvian Chamber of Commerce and Industry

Contact person:

Jānis Mārtiņš Skuja, Executive director

E-mail: jms@jms.lv

Phone: +371 29541221

Web: www.plcc.lv

The Polish–Latvian Chamber of Commerce and Industry (PLCC) is a non-governmental organization focused on strengthening economic cooperation between Poland and Latvia. Established in 2021 and officially registered in 2022, the Chamber serves as a platform for promoting bilateral trade, investment, and business collaboration.

PLCC brings together companies from various industries, including finance, logistics, manufacturing, IT, and professional services. It supports both businesses already operating in both markets and those seeking expansion opportunities. The Chamber's mission is to foster sustainable partnerships by providing market insights, networking opportunities, and practical support for cross-border activities.

The organization assists its members in identifying business partners, understanding regulatory frameworks, and entering new markets more efficiently. Through business forums, networking events, trade missions, and seminars, PLCC facilitates knowledge exchange and relationship building among its members.

Working closely with public institutions and supported by the Polish Embassy in Riga and the Latvian Embassy in Warsaw, PLCC acts as a bridge between the two business communities. With a growing network of members, the Chamber continues to strengthen its role as a trusted partner, contributing to increased trade, investment, and economic cooperation between Poland and Latvia

Banking

Rietumu Banka JSC.

Contact persons:

Sandris Straume, Member of the Board,

E-mail: sandris.straume@rietumu.lv

Combining deep linguistic expertise with advanced AI technologies, the company develops domain-specific large language models (LLMs) tailored for government, public services and industry.

Tilde's solutions provide high accuracy and contextual relevance in areas such as legal text processing, e-government communication and multilingual customer support. The company's AI technologies power machine translation systems, AI assistants and speech technologies that enhance multilingual communication and digital services.

Products/services

Development of AI-based language technologies, including machine translation systems, large language models (LLMs), AI assistants and speech technologies. Tilde provides tailored AI solutions for government institutions, public services and enterprises requiring multilingual communication and advanced language processing.

Potential Business Partners

Public sector institutions responsible for digital government solutions, ICT and AI companies, system integrators and technology platform providers. Tilde is also interested in cooperation with research centres and universities working in the field of artificial intelligence.

Ventspils brīvostas pārvalde

Contact person:

Inga Ieviņa, Deputy Head of Marketing and Development Department, Public Relations Manager

E-mail: inga.ievina@vbp.lv

Phone: +371 26520 710

Web: portofventspils.lv

Freeport of Ventspils (Ventspils brīvostas pārvalde) is one of the leading EU deep-water ports on the eastern coast of the Baltic Sea and one of the largest industrial hubs in the Baltic States. Ventspils is part of the European TEN-T core transport network and has historically served as a strategic export and transit hub for various cargo flows, including chemicals, potassium salt, coal, grain, general cargo and Ro-Ro freight. Today, Ventspils is a multimodal Latvian port capable of handling all types of cargo, including oversized project cargo, offering competitive port fees, modern terminals and well-developed logistics infrastructure. The port is connected to European and Scandinavian markets through efficient road and ferry transport links, forming an important cargo corridor in the Baltic Sea region.

Its ice-free status and technical parameters allow the port to accommodate the largest vessels entering the Baltic Sea year-round. Freeport of Ventspils provides significant industrial development opportunities, including approximately 100 hectares of land for an offshore wind service terminal and centre, as well as around 500 hectares for industrial projects related to wind energy component manufacturing and service expansion. One of the key focus areas is the development of a renewable energy production and service community, including wind farm servicing, solar energy production, hydrogen (H₂), e-methanol, green ammonia, biofuels and more.

Potential Business Partners

Companies and investors interested in industrial projects, logistics, cargo transport, renewable energy solutions, dual-use technologies, ICT, construction, and defense technologies.
